

Screen contrast

You can adjust the screen contrast to make the screen easier to see. The screen contrast setting can be accessed from the preferences menu.

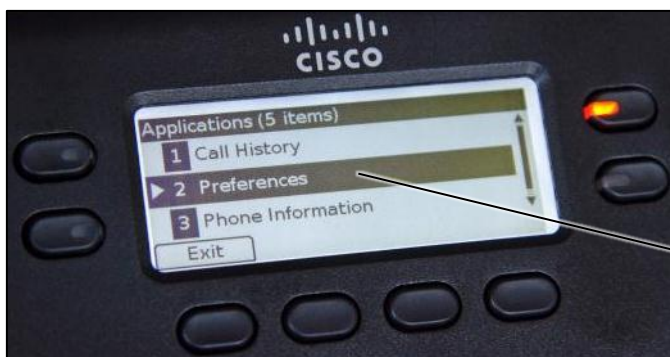

Opening the preferences menu

To open the preferences menu:

- Press the **applications** button
- Use the **navigation bar** to highlight **Preferences**
- Press the round **select** button

Press the **Applications** button to access the preferences menu

Use the navigation bar to highlight preferences and then press **select**

Setting your screen contrast

- In the preferences menu, highlight and select **Contrast**
- Use the **navigation bar** to increase or decrease the contrast level
- Press the **Save** softkey

Use the navigation bar to increase or decrease the contrast level

To keep the contrast level you have selected, press here
