

US Department of Veterans Affairs Benefits

Manchester Metropolitan University is approved to process Veterans Affairs Benefits, offered by the US Department of Veterans Affairs through various GI Bill programmes.

Please see [US Department of Veterans Affairs Education and Training - Get Started](#) for further information regarding benefits available. Eligibility for benefits is determined by the [US Department of Veterans Affairs](#).

Programme eligibility

Please email USfinancialaid@mmu.ac.uk to let us know if you are applying for benefits, so that we can ensure your chosen programme and period of study is approved by the Department of Veterans Affairs.

If your programme has not yet been approved, the University can seek approval, subject to your holding an offer of admission to study at Manchester Met. The approval process can take a number of weeks, so we would advise you to contact us as soon as possible.

Please see [US Department of Veterans Affairs Education and Training - Get Started](#) for further information regarding benefits available. Applications for benefits can be made online.

Please note the Department of Veterans Affairs cannot award benefits for distance learning programmes.

Certification of enrolment

Providing your programme has received approval by the Department of Veterans Affairs, and you have registered on your programme, the University is required to certify your enrolment before your benefits will be released.

Enrolment will be certified for one academic year at a time. Continuing students wishing to claim benefits must contact us each year to request further certifications of enrolment to be submitted. Please email USfinancialaid@mmu.ac.uk.

Receipt of funds

Tuition fee payments will be made directly to the University after enrolment has been certified. Any funding for living costs will be paid monthly to you by the Department of Veterans Affairs.

Further information

You should contact the Department of Veterans Affairs directly to enquire about the status of your benefits. Please see their [FAQ](#) for further guidance.
